

INTRODUCTION TO JAVA

LECTURE 1 : FLOWCHARTS

All fibonacci numbers

You are given a single non-negative integer, N . You need to print all numbers that:

- (i) occur in the range 0 to N (both inclusive)
- (ii) are a part of the fibonacci sequence

Draw a flowchart for this process

Note 1: The first two terms of the fibonacci sequence are 0 and 1.

Note 2: You don't need to submit the problem. Just attempt in your notebook and ask doubts if you need help.
