

FRONT END – PART 2

UNDERSTANDING DOM

(Change Color and Shape)

This time let's make a small game where user clicks on buttons provided and the color or the shape changes. The user then have to tell which color or shape it is.

For this game, create a small area and add a initial color to it. Inside it we will be providing shapes with 'square' as initial shape.

You need to provide at least three different shapes and colors.

Now provide two buttons as -

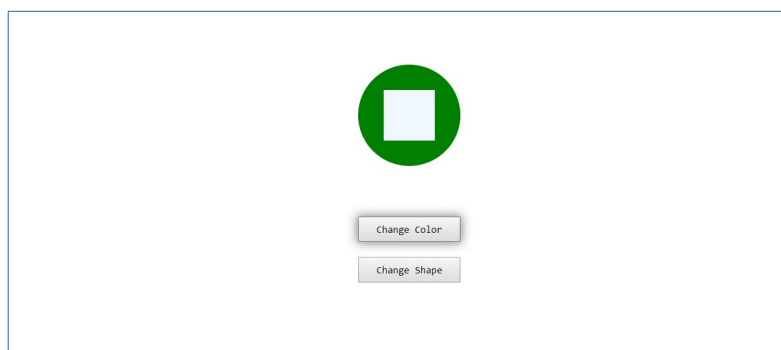

1. 'Change Color' to change the background color.
2. 'Change Shape' to change the shape.

Clicking on these buttons should change the color background color and shape randomly.

The page should looks like this -

After clicking on 'Change Color', the color of the background will change in a random fashion as shown -

After clicking on 'Change Shape', the shape will change in a random fashion as shown -
