

FRONT END – PART 2

CONSTRUCTORS AND PROTOTYPES

(Set the value of 'this')

Look at the code provided.

1. Call the function `printName()` with the value of 'this' set to the `john` object using hard binding.
2. Then call the `greet()` function with the value of 'this' set to the `CN` object using any binding.

Expected output:

```
▶ {name: 'John', greet: f}  
Hello! My name is Coding Ninjas
```
