

## **FRONT END – PART 1**

### **INTRO TO CSS**

#### **Add Basic Styles to Blog**

Now, we have started with a new phase of our course and it is going to change a lot about how your blog looks like.

So, we are going to improve the page for better visualization and distinguishing between different parts of the page.

Let's try to change color, size of fonts of paragraphs from the blog page.

**The task that you need to perform are described below -**

**TASK 1: Increase the size of the title("5 Tips For Frontend Development") of your blog page to '40 pixels'.**

**TASK 2: Change the color of the paragraphs in the list of your blog to 'dimgrey'.**
