INTRODUCTION TO JAVA
LECTURE 1 : FLOWCHARTS

Member of Fibonacci

You are given a single non-negative integer, N. You need to find out whether N is a part of the fibonacci sequence.

Print "Yes" if it is and "No" if it's not.

Draw a flowchart for this process

Note 1: The first two terms of the fibonacci sequence are 0 and 1.
Note 2: You don't need to submit the problem. Just attempt in your notebook and ask doubts if you need help.
