FRONT END – PART 1
INTRO TO CSS

Set Width and Height in Blog

You are going to set the width and height for some elements of the page.

But first, try to change the width and height of some elements of the page according to your taste.

The tasks you need to perform are -

TASK 1: Set the height of the header of your blog page to 400 pixels.
TASK 2: Set the width of your article to 1000 pixels.
